

Nir Harel

Artist, teaching in
Bezalel, founder of
Koma6 magazine.

Hollow Sights is an
option to look
through an object,
it's a series of
attempts to "objec-
tify" our gaze
through mobile
phones, web pages
that function as
cameras, folding
your device camera
input into a 3d
model and allow you
to capture still
photos video and
control the camera
source.
